More Details:

4K UHD Sony CMOS Sensor

This webcam is built with a Sony CMOS sensor that features up to 3840*2160 UHD resolution at 30 frames per second, producing vivid imagery with outstanding clarity, vibrant color rendition, and crisp details.

Perfectly Auto-Framing with AI Technology

Whether people join in or leave the room, the framing position can be adjusted automatically by facial detection technology, and always keep everyone in the center.

Smooth Communication with Long-Range Mics

The 2 omnidirectional mics capture your voice clearly from all sides, with 5 meters of effective pickup range. Let your communication with remote participants always run smoothly.

80° FOV Captures More Details

With a 80 degrees field of view angle, the webcam ensures you and your team can be clearly seen. It captures every detail at 4K clarity to create inclusive video calls even when the spaces are limited.

Plug and Play, Easy to Set Up

Easy of use and Type-C plug and play capability, no additional driver is required. Just plug it in and you are ready to go.

Ready for Anything

This webcam is compatible with Win XP, Vista, 7/8 / 8.1 / 10, Mac 10.4 or higher, and compatible with popular video conferencing applications like: Zoom, Teams, WebEx, Skype, Youtube, OBS, Vmix, etc, just as impressive for gaming and streaming.
